

Section 704 – Sump Pump Piping

Section 704:00      Prohibiting Storm Water Disposal into the Sanitary Sewer System.

- Section 1.      New Structures.      All new structures or buildings constructed after this section's passage and publication that have useable space below grade shall have a perimeter drainage system and operational sump pump connected to permanent schedule 40 Acrylonitril-Butadiene-Styrene (ABS) or Polyvinyl Chloride (PVC) piping, which ejects water to grade at the exterior of the structure or building in a manner that does not adversely affect adjacent property owner.
- Section 2.      Effective Date.      This ordinance shall be effective upon its passage and publication.

The City of Foley 1974 Code of Ordinances was amended by adding Section 704:00 in its entirety by Ordinance Number 323, passed and adopted July 2, 2002. Published and effective August 27, 2002.
