

Dewey Street Demonstration Project

The downtown demonstration project has been completed. The temporary bike lane and parallel parking stripes have been removed.

Benton County Public Health would like to thank the community members and businesses owners for providing your feedback. The project brought conversations about being active in our community along with conversations about parking and the overall look and feel of downtown Foley.

We encourage the community members to continue to get out and be active. The council will make the final decision on the project at the Sept. 5 City Council meeting. The graph below allows you to see the community's response to the overall project.

Q8 Do you support making some or all of the new configurations permanent on Dewey Street?
